

The company:

We are a Business Process Automation company that is expanding our Managed Services Group to provide project and operational service to our enterprise-class customers. Our Customers are varied within several sectors of industry, and therefore provides a unique opportunity for exposure on how different industries work and provides unique project experiences.

The opportunity:

Process Fusion Inc. is seeking a Software Developer to join us as a permanent employee. Reporting to the Director, Product Engineering, this is a Toronto-based role working primarily on existing software and products. You will be working with a small team of awesome peers working towards a common goal, using newer technologies or modifying existing products to provide solutions to customers.

Who you are and where are you now?

You are an exceptional Analyst-Programmer who would love to bring your enthusiasm to create, implement and finalize features of our existing software. You will work in collaboration with other internal staff and/or customers in order to understand and solve issues related to the product and different environments. For this roll we are open to all levels of experience, however we are looking for a great fit and desire to program, troubleshoot and bring fresh ideas into the team.

What you bring

- University/College degree or equivalent experience in a relevant discipline; or
- You have at least 3 years' experience in a similar role
- Good understanding of computer systems and networking protocols
- Must have working knowledge of REST API, .NET technologies
- Strong experience with C#
- Proficient in the Microsoft Visual Studio IDE and C
- Experience in multi-threaded C/C++ development.
- Knowledgeable of frontend (Angular 2+, Bootstrap) frameworks

Basic Skills and Competencies

- Strong problem solving and debugging skills
- Good communications skills (oral and written)
- Excellent written and spoken English
- Ability to manage your time and projects effectively

Beneficial Qualifications

- Experience programming in virtualized environments (VMWare, RDS, XenApp)
- Experience with SQL and relational databases
- Experience with Microsoft Azure Cloud technologies and development

Please send us your resume

- Principals only. Recruiters, please don't contact this job poster
- Do NOT contact us with unsolicited services or offers
