

Digital Transformation – Software Developer

Office Location: Etobicoke

The Company:

We are a Business Process Automation company that is expanding our Managed Services Group to provide project and operational service to our enterprise-class customers. Our Customers are varied within several sectors of industry, and therefore provides a unique opportunity for exposure on how different industries work and provides unique project experiences.

Our mission is to help organizations automate critical business processes, exchange information securely, and eliminate the inefficiencies and errors associated with manual and labor-intensive processes.

The Opportunity:

Process Fusion Inc. is seeking a Software Developer to join us as a permanent employee. Reporting to the Chief Product Officer, this is a Toronto-based role working primarily on existing software and products. You will be working with a small team of awesome peers working towards a common goal, using newer technologies, or modifying existing products to provide solutions to customers.

You are full of ideas and would like to implement them in the world of Machine Learning and Capture Documents. You will use your knowledge and skills to create, implement and finalize features of our existing software. You will work in collaboration with other internal staff and/or customers in order to understand and solve issues related to the product and different environments.

Position Responsibilities:

- Resolve technical issues that are encountered
- Design and develop new products and features
- Provide mentorship and direction to your peers when needed
- Offer potential designs and solutions for technical problems
- Participate in code reviews
- Keep skillset up to date on newer technologies

Minimum Requirements:

- University/College degree or 3 years working experience
- Experience with authentication technologies: Active Directory Lightweight Directory Services, SAML, SSO
- Experience working with front end technologies like: HTML, CSS, Javascript & AJAX
- Python programming language
- Experience with web hosting in Microsoft IIS
- Experience with database technologies: Oracle, Microsoft SQL, PostgreSQL
- Experience with web service technologies: SOAP, REST
- Experience with Microsoft Visio
- Experience with Microsoft Office Suite

- Understanding of .NET technologies: ASP.NET, C#, MVC would be an asset
- Experience with Object Oriented Programming would be an asset.
- Some data analysis and metrics reporting would be an asset

Soft Skills:

- Ability to manage your time and projects effectively
- Eagerness to learn
- Passionate about technology
- “Think outside the box” mentality
- Good written and spoken English
- Self-motivated

Benefits:

- Competitive basic salary plus commissions
- Full benefit coverage starting after 3 months, including life, health, and dental
- RRSP with company participation
- Tuition reimbursement

Directions to Apply:

- Please send us your resume
- Please include a cover letter telling us why you are going to be great in this role.
